Bedford, NH 03110
603-471-9210

Agile Product Owner with a strong technical skillset and the ability to lead teams, maximizing the business value delivered to the customer. Force multiplier motivating my teams via mandatory fun.

PROFESSIONAL EXPERIENCE >>>

NEWFORMA, Manchester, NH

2016

Product Owner

- Responsible for turning strategy and vision into tactics for our Cloud Services (AWS) and mobile iOS scrum teams for our architecture, engineering, and construction SaaS products
- Inspected, adapted, and iterated our agile processes during 2 week sprints, including daily standups, retrospectives, backlog refinements, and sprint reviews
- Facilitated Program Increments to coordinate efforts across multiple teams integrating feedback from sales, product management and support

CUSTOMSCOOP/CARMA, Concord, NH

2011-2016

Vice President of Technology

- Leveraged agile methodologies with my team and continued to be a lead developer focusing on back end architecture using my strong problem solving skills
- Highly skilled in MS SQL server allowing for close collaboration with the sales team and customer service to develop new projects and architect solutions
- Managed project work with my team of developers, taking into account ROI and time to market while maintaining our company's core competencies
- Responsible for all aspects of technology including development, QA, IT, and hosting
- Planned and executed a RackSpace to Network Access datacenter migration (physical to virtual/private cloud) of over 25 servers, dozens of applications, and firewalls

CUSTOMSCOOP, Concord, NH

2003-2011

Senior Developer

- Maintained our Big Data solution built on several hundred gig databases containing hundreds of millions of rows on MS SQL in a highly transactional Windows environment
- Finely performance-tuned database schemas to scale upwards of 8,000 transactions a second, leveraging strong T-SQL and data architecture skills
- Reduced hardware footprint by over 50% by rewriting all web spidering technology
- Scaled our searching capabilities to spider over half a million websites searched multiple times daily as well as Twitter, YouTube, Facebook, TV, Radio and custom feeds, collecting over 2 million articles each day for hundreds of customers

SKILLSOFT INC., Nashua, NH

2002-2003

Business Application Developer

- Principal developer on Extract/Transform/Load team, building the custom Data Warehouse running on MS SQL Server

SKILLSOFT INC., Nashua, NH

1999-2002

Hosting Administrator

- From zero to hundreds of customers: designed, implemented, and administered the hosting solution responsible for 60% of the company's revenue requiring 24/7/365 uptime with 1 hour customer SLA

TECH PC INC., Manchester, NH

1997-1999

Network Engineer/Field Technician

- Conducted technical calls on customer sites to troubleshoot and repair hardware, software, and network problems throughout NH
